Excellent

By Alex Malinovich

I picked this up completely on a whim after hearing someone mention it online. It is absolutely an amazing work. To really get a feel for how far this country has come in 50 short years, and to really understand how far we have left to go, you need to read this.

As a white male, I've always been offended by the term 'white privilege', because it implies that I somehow didn't work for what I have. But having read this, I can finally appreciate it. My 'white privilege' has nothing to do with me not working hard and not deserving the things that I have accomplished. I have worked hard, and I do deserve those things.

But these are things that blacks never had the opportunity to do. No matter how smart they were, no matter how well dressed, or well spoken, no matter how *white* they tried to appear to blend in, they would never be given the opportunity to prove themselves on their own merits. Their opportunities were taken away before they ever had a chance to even attempt to do grab them.

And while I can definitely appreciate how far we have come in a relatively short time, I am now able to see with a fresh new perspective the things that are still wrong with our thinking today.

I highly recommend this book

By Bwhami

The book was written in 1960 and is still relevant today. John Howard Griffin turned himself into a Black man using medications and sunlamp treatments. He then proceeded to visit several southern cities. He describes his treatment by white people, who weeks before had greeted him in a friendly manner when he was white, with hatred and ignorance. He talks about walking several miles to find a bathroom or a place to get a drink of water. He also tells how black people would go out of their way to help a fellow black man. The book is well written and makes you think seriously about the present state of race relations in the light of all the current race issues. White people need to read this book. I highly recommend this book.

Reading again

By Diana Anderson

I first read this book when I was a teenager in a small town in Oklahoma at the urging of my mother. It was eye-opening and I was appalled by the truth within its covers. It influenced me more than any other book. I read it again at this juncture after more than fifty years to observe the changes in our shared lives. There are many. Those changes seem to exclude certain hearts that cling doggedly to their own unacknowledged fear of anyone who is not the same as they.

We are not seems anything new when we see today's headlines; we are just seeing the ugly reality of a nation that has not progressed.
