Leadership Essentials is a collective release of leadership tips and techniques as simple as your most basic needs, yet as complex as the very nature of the cultural diversities in which you live today.

It is a manual on how to live in a world where globalization and technological advances have toppled the walls of traditional leadership hierarchies, a world in which leaders must come to know and understand the evolution of change and how to develop, inspire, and guide their organizations [and their careers] through the tactical challenges coming at them both faster and more different than ever before.

Does leadership matter? Consider that in a recent employee survey, the number one reason why employees leave an organization is because of their relationship with their supervisor. While pay, benefits, and opportunities are certainly important, great leadership is what counts relative to motivation, safety, productivity, and effectiveness.
